

As a user of XM Satellite radio I request that you reject the National Association of Broadcasters petition 04-160. As a frequent traveller, XM Satellite radio provides the programming content that I like and is not available elsewhere. The ability to listen to content that I like, also makes me a safer driver as I am not searching through am or fm bands to find desirable programming as I move about the northeast. The instant weather and traffic advisories are the principal reason I chose the XM satellite product. Please do not limit my rights to hear what I want to hear when I want to hear it. Please reject the NAB petition 04-160 and leave my programming alone. Thank you for your attention to this matter.
